NLGI High-Performance Multiuse (HPM) Grease Specification Update

NLGI's HPM Grease Specification Steering Committee, led by Mike Kunselman Center for Quality Assurance and Chuck Coe, NLGI Technical Expert, carried out a successful virtual workshop on March 25, 2020. The workshop purpose was to form consensus and discuss in-depth issues around new specifications.

Interviews of end users, grease manufacturers and other stakeholders took place. This workshop brought a wide range of Grease Industry companies and industry segments together to begin finalizing performance test parameters and limits. Workshop participants shared thoughts on::

- HPM Core Spec
- Water Resistance (+WR)
- Corrosion Resistance (+CR)
- High Load (+HL)
- Low Temp (+LT)
- Long Life (+LL)

The Grease Specification Steering Committee's next step is to compile breakout groups' raw data and map areas needing further deliberation. NLGI members will be kept informed of further developments.

Note: The High-Performance Multiuse (HPM) Grease is not replacing GC-LB. NLGI will continue to offer the GC-LB certification mark as long as there's a market for it. The High-Performance Multiuse (HPM) Grease will be available in early 2021 for a broad range of markets.

About NLGI: As a nonprofit trade association founded in 1933 by pioneers of the lubricating grease industry, the National Lubricating Grease Institute (NLGI) was established with the goal of providing education, scientific and technical information, expert advice, profitable partnerships and a global forum for ideas and innovation. The mission of the organization is "to provide resources relevant to the needs of the global grease community." Learn more at www.NLGI.org

About CQA: The Center for Quality Assurance (CQA) has over 25 years of experience working with industry partners to advance technology through the design, development and administration of specification programs. Our vision is to be the global leader in providing knowledgeable and innovative programs and solutions that will enhance the quality and application of our client's products and create better experiences for consumers and users.
